Thomas Talbot

James Winters

Contents

Aim

The aim of these meetings is to have a critical review of the iteration and assess any improvements needed for the next iteration.

User stories completed

- S01.0.0 (Load a PWS XML file) and all sub-stories
- S02.0.0 (See a map with all major points-of-interest visible in the location) and all sub-stories
- S04.0.0 (Unlock rewards from visiting locations) and all sub-stories

Problems occurred during iteration

- IDE conflicts with required libraries (Android Studio and Intellij)
- Java version conflicts
- Didn't have access to a physical android phone for testing

How the problems were solved

- Android app ported from Android Studio to intellij
- Particular Java version decided upon
- Android phone acquired

Improvements for next iteration

- A code review and style standard to be enforced to improve code consistency
- Ensure all junit testing is completed for next iteration
